---

## **\*\* TABLE OF CONTENTS \*\***

76 PAGES | 52 Tables and Charts | June 2012

### **Executive Summary**

Purpose of the Study

Correcting Errors In Consensus Mobile Data Forecasts

Key Conclusions

The Demand FUNNEL: Calibrating The Rate of Change

- Chart 1. The Demand FUNNEL

### **Chapter 1 - Mobile Internet - The New Challenges**

The Emergence of a New Mobile Data Ecosystem

- Chart 2. Mobile Data - Three Sub-Ecosystems
- Chart 3. OLD Ecosystem - CARRIERS in Control

Conflict Between Carriers and New Device and Apps Providers

- Table 1. 10-Year Equity Value Creation: Mobile Carriers vs. Growth Companies

The New Power Relationships

- Chart 4 New Relationship of 3 Ecosystems

The Coming Demand DELUGE and Shock

The Mobile “Time Warp” Post-2008

- Table 2 Mobile’s Time Warp & Shocks: Selected Key Future Drivers -2008 Outlook vs. 2011 Outlook

### **Chapter 2 - Consensus Forecasting Defects - Cisco VNI Study**

Key Defects In Consensus Mobile Data Forecasting - Cisco VNI Study

- Table 3. Cisco VNI Forecast of Mobile Data Traffic Growth 2010-2015
- Table 4. Computation of Average Cell Site Traffic Based on Cisco VNI Study 2015
- Table 5. Cisco VNI Study Comparison of Fixed Internet & Mobile Data Growth Rates

Critical Flaw - Equating Mobile Internet and Fixed Internet Growth Outlook

- Table 6. Major Differences In Drivers Between Historic Fixed Internet and Projected Mobile Data Growth

A New, Bottom-Up Demand Forecasting Methodology

Respected Sources Indicate Mobile Demand Forecasts Are Far Too Low

- Table 7. Estimated Breakdown of U.S. Cell Sites 2015 By Traffic Category

Bottom-Up Approach Versus the Cisco Forecast: Results Compared

- Table 8. Cisco vs.BSG Estimates of Traffic Per U.S. Cell Sites 2015 By Category Of Cell Site

### **Chapter 3 - Mobile Networks - Tracking Demand Growth**

Understanding Mobile Networks - Using Backhaul Demand As A Metric

Disruptive Developments That Drive Unprogrammed Growth

- Chart 5. Basic Wireless Network Architecture

Tracking the Demand DELUGE Through Backhaul Growth

Growth In Cell Sites - Part of the Picture

- Table 9. U.S. Cell Site Growth, June 2000 to June 2010
- Table 10. U.S. Cell Site Projected Growth, 2010-2015

Subscriber Growth

- Table 11. U.S. Mobile Subscriber Growth, 2005-2015 Projected

Device Growth

- Table 12. Smartphones, Tablets, Other HHs, Growth Projection U.S. 2010-2015
- Table 13. Smartphone Average Pricing (After Discounts) vs. All Handhelds

Growth In Multi-Device Subscribers

Expansion of Broadband Apps

- Table 14. Apps Usage - % of Users Using A Given App
- Table 15. Leading Apps, % of Total Data Bandwidth Used

Augmented Reality Emerges

Increased Wireless Substitution

- Table 16. Percent of U.S. Households That Are Wireless Only

Regulatory Pressures to Expand Broadband

### **Chapter 4 - The Bottom-Up Demand Forecast Model**

The Carrier Data-Driven Dilemma

Three Primary Elements of Demand Growth

Methodology - Modeling Potential Backhaul Demand in 2015

Demand Potential of Key Apps

- Table 17. Breakdown of Key Mobile Apps By Category
- Table 18. Bandwidth Assumptions For Key Mobile Apps, 2010 vs. 2015

- Table 19. Projected Device Breakdown By Type, 2015
- Modeling Traffic Through a Single Cell Site - 3 Cases Examined
- Table 20. Cell Site User Assumptions 2015 - 3 Cases
- Two Usage Scenarios For Each Case
- Case 1 - 40 Users at Peak
- Table 21. Case 1 Breakdown of Devices by Category, Single Cell Site At Peak 2015
  - Table 22. Case 1, Scenario 1 - Peak Usage At Single Cell Site 2015
  - Table 23. Case 1, Scenario 2 - Peak Usage At Single Cell Site 2015
  - Table 24. Case 1 Peak Usage At Single Cell Site 2015 - Two Scenarios
  - Table 25. Case 1 Augmented Reality Impact on Demand Single Cell Site 2015
  - Table 26. Case 1 Backhaul Traffic Requirements 2015
- Case 2 - 80 Users at Peak
- Table 27. Case 2 Breakdown of Devices by Category, Single Cell Site At Peak 2015 ..... Error! Bookmark not defined.
  - Table 28. Case 2, Scenario 1 - Peak Usage At Single Cell Site 2015
  - Table 29. Case 2, Scenario 2 - Peak Usage At Single Cell Site 2015
  - Table 30. Case 2 Peak Usage At Single Cell Site 2015 Two Scenarios
  - Table 31. Case 2 Augmented Reality Impact on Demand Single Cell Site 2015
  - Table 32. Case 2 Backhaul Traffic Requirements 2015
- Case 3 - 120 Users at Peak
- Table 33. Case 3 Breakdown of Devices by Category, Single Cell Site At Peak 2015
  - Table 34. Case 3, Scenario 1 - Peak Usage At Single Cell Site 2015
  - Table 35. Case 3, Scenario 2 - Peak Usage At Single Cell Site 2015
  - Table 36. Case 3 Augmented Reality Impact on Demand Single Cell Site 2015
  - Table 37. Case 3 Backhaul Traffic Requirements 2015
- Summary of 3 Cases
- Table 38. Backhaul Demand 2015 Summary of 3 Cases

## **Chapter 5 - Analyzing Traffic Growth Impact on U.S. Mobile Industry**

### **Overall Demand Requirements**

#### **Estimating Cell Site Distribution By Level of Traffic Load**

- Table 39. Cell Site Density - Conn. Sample vs. U.S. Totals
- Table 40. AT&T & Verizon Cell Site Data From Sample Area
- Table 41. Verizon Wireless National Cell Site & Subscriber Data

- Table 42. Population Breakdown by Density Tiers 2015  
Breakdown of Cell Sites By Traffic Load Category
- Table 43. Estimated Breakdown of U.S. Cell Sites 2015 By Traffic Load Category
- Table 44. U.S. Backhaul Requirements By Category of Cell Sites 2015  
Comparing Cisco VNI and Bottom-Up Model Results
- Table 45. Cisco VNI Study Contrasted - Peak Demand, By Cell Site Category
- Table 46. Cisco VNI Study Contrasted - Total Traffic Per Month (Petabytes)

## **Chapter 6 - Conclusions**

“Potential Demand” - Industry Alternatives

Technological Change As A Factor

Options For Addressing the Demand DELUGE; “Offloading” and Others

The Potential of Offloading Analyzed

Pricing Changes Analyzed

Competitive Entry and Regulatory Policy As Factors

## **Appendix A. Collateral Impact of the Backhaul Effect: The Future of Telcos**

### **Appendix B. Evolution of Backhaul Technology**

Mobile Network Ecosystem

- Chart 6. Mobile Network Ecosystem Architecture, 2011-2015

End User Systems

- Table 47. RAN Standards Status

Backhaul

Core

Evolution of RANs

Backhaul and Mobile Technology Evolution

Backhaul Facility Demand
